Goodbye Summer, Hello Fall!

September 2025

We are reaching the end of the summer here in Upstate NY. We can count on a few more heatwaves that last a day or two, but with the sun beginning to set a little bit earlier each night, we're not too far away from the crisp cool evenings of the fall. Before then, we'll try to hit the golf links once or twice more, take a dip in the pool, and enjoy the warm weather before its gone.

We will also be preparing for some upcoming trade shows to close out the year in Q4, including the Utility Expo in Louisville, KY and IEEE PES GTD Asia conference in Bangkok.

Will we see any of you there? Drop us a line in on our inbox or a

comment on one of our social media channels!

Follow Us on Social Media

Speaking of Social, are you following us?

We share different pieces of content several times a month on our social channels, like photos from some of our recent trips across the globe, updates from happy HVI customers, and of course some of our more memorable milestones over the last 25+ years.

If you don't already follow us, you can find us here on LinkedIn:

<https://www.linkedin.com/company/high-voltage-inc./>

You can find us here on Facebook:

<https://www.facebook.com/thevlfsource/>

We are always looking to expand our video-based content and we have a YouTube channel you can subscribe to, which can be found here:

<https://www.youtube.com/channel/UCM1VXmLOKCVWy71w6zSxKZw>

Lastly, be sure to check out our ever-expanding Knowledge Center, where you will find lots of helpful product and application information, including documents, PowerPoints, videos, and more! You can find it at:

PRODUCT SPOTLIGHT

PFT Series - Versatile AC Hipots for Apparatus Testing

This quarter's Featured Product line is the PFT Series of AC hipots. This is one of HVI's "flagship" lines of equipment, used on every continent across the world for a wide range of high voltage testing applications, including:

- Hot sticks
- Vacuum bottles
- Rubber gloves
- Motors & Generators
- Switchgear
- Iso-phase bus
- ...and more

These are among the lightest, smallest and most economical units available on the market, especially for those capable of delivering these power ratings and offering these features.

Ranging from 10kV to 100kV, there is a suitably sized and priced unit to fit your specific needs.

If you're in the market for a general purpose AC hipot, visit the [PFT Series page on our website](#).

If you need assistance in sizing or choosing any hipot testing equipment, contact us at: sales@hvinc.com

3,000th VLF Unit Sold!

We recently learned that HVI shipped its 3,000th VLF unit since the company was started. If you do the math, that's over a hundred a year!

In January of next year, it will have been 25 years since our founder Stanley Peschel was awarded a patent for his "Very low frequency sinusoidal electrical testing method, systems and apparatus". Since then, HVI has pioneered the field of VLF testing and supported its adoption within the industry as a common testing method.

We are very proud that you'll find one of our VLF units on every continent across the world, including Antarctica! We couldn't have done that without you, our customers, of course - so thank you!

ALT Series Video COMING SOON On YouTube and Website!

Just a reminder that HVI has a YouTube channel!

We have Sales videos for several of our most popular product lines, so if you're trying to decide on a hipot or other high-voltage testing equipment, you can learn more about our wide range of offerings.

We'll soon be adding a new video for our popular ALT Series lines of aerial lift testers, so stay tuned! Be sure to visit and check back in the future for the rest of our video library at our main YouTube channel here:

HVI Visits Geneva in Switzerland for CIRED 2025

HVI had the pleasure of visiting Geneva in Switzerland a few months ago for CIRED 2025. CIRED is one of the top energy conferences in the world, and this marked HVI's 20th year of exhibiting, starting back in 2005. Our very own Stephen Peschel and Ed Kirby took the trip overseas and had many great conversations.
