Winter Is Here!

November 2025

We have passed peak leaf season here in Upstate New York and are moving firmly into winter. The first flurries of snowflakes have already started swirling, and it's only a matter of time before they start collecting on the trees and ground. It gets cold, but the scenery this time of year is straight out of a postcard.

Here at HVI, we're getting ready for some of the upcoming holidays and cranking up effort to get some of the last units for 2025 out the door before the end of the year. We can't believe the year is almost over already!

We will also be preparing for some upcoming trade shows to close out the year in Q4, including the EP Shanghai Exhibition and the IEEE PES GTD Asia conference in Bangkok.

Will we see any of you there? Drop us a line in on our inbox or a comment on one of our social media channels!

Follow Us on Social Media

Speaking of Social, are you following us?

We share different pieces of content several times a month on our social channels, like photos from some of our recent trips across the globe, updates from happy HVI customers, and of course some of our more memorable milestones over the last 25+ years.

If you don't already follow us, you can find us here on

LinkedIn:

<https://www.linkedin.com/company/high-voltage-inc./>

You can find us here on Facebook:

<https://www.facebook.com/thevlfsource/>

We are always looking to expand our video-based content and we have a YouTube channel you can subscribe to, which can be found here:

<https://www.youtube.com/channel/UCM1VXmLOKCVWy71w6zSXKZw>

Lastly, be sure to check out our ever-expanding Knowledge Center, where you will find lots of helpful product and application information, including documents, PowerPoints, videos, and more! You can find it at:

PRODUCT SPOTLIGHT

ALT Series - Versatile AC Hipots for Aerial Lift Testing

This quarter's Featured Product line is the ALT Series, which are AC hipots designed for aerial lift and bucket truck testing.

HVI offers the ALT Series for testing the insulation of booms, liners, and insulating fluids in aerial lift applications. The flagship model, our ALT-130/60 is one of the most powerful and fully featured aerial lift testers on the market.

Its original design was for aerial lift testing, as required by ANSI Standard 92.2; its power ratings and mobility, however, also make it suitable for a wide range of other AC withstand testing applications:

- Iso phase buses
- Bushings,
- Rubber gloves,
- Hotsticks
- and more...

We've recently released a new Product Overview and Operation video for the ALT

Series, which you can find on the main product series page here:

<https://hvinc.com/products/ac-dielectric-test-series/alt-series/>

If you need assistance in sizing or choosing an aerial lift tester, or any other kind of hipot testing equipment, contact us at sales@hvinc.com

Spotted in the Wild: HVI Equipment Across the Globe

Our high voltage testing equipment is used all across the world, on all seven continents, including Antarctica. We will occasionally receive photos from former or current customers and/or colleagues, who come across our equipment "out in the wild".

One recent example comes all the way from Geoje, South Korea.

A contractor working for a multinational company that specializes in energy exploration was using a piece of HVI equipment to test some of their recently installed high voltage switchgear! The equipment in question was most likely part of our popular PFT Series of AC hipots. These are great as a general purpose hipot for testing a wide range of electrical apparatus, including switchgear.

Pretty cool, huh? If YOU spot a piece of our equipment out in the field, send it our way - we love to see this stuff

Features

- Digital display and menus
- Printer and data export functionality
- USB port
- Pre-programmed and user-defined tests
- Digital controlled rates of rise
- High degree of accuracy
- Viewing window

ALT Series Video NOW LIVE On YouTube and Website!

Just a reminder that HVI has a YouTube channel!

We have Sales and Product Operation videos for several of our most popular product lines, so if you're trying to decide on a hipot or other high-voltage testing equipment, you can learn more about our wide range of offerings.

We just added a new video for our popular ALT Series lines of aerial lift testers, which you can watch here:

HVI Attends Utility Expo 2025 in Louisville, KY

HVI had the pleasure of attending and exhibiting at the recent Utility Expo show in Louisville, Kentucky.

This show is every 2 years and usually has a large outdoor exhibition area for vehicles and larger equipment. A rainy first day of the show, however, drove a lot of foot traffic into the inside hall. We've been attending for years and we couldn't recall such levels of foot traffic in recent memory!

It was fine for us, though. We love meeting and greeting new faces, and we had some great conversations with folks, learning what they do within their roles and their in-field needs. We're a customer-focused company, so we love hearing direct feedback and on-the-ground industry observations.

Here's a photo of our own Dave Boyer, talking with some attendees and showing them a unit from our ALT Series of AC hipots. Looking good, Dave.

Speaking of travel , check out our Upcoming Events below for the rest of Q4 2025. We hope to see you in the future as well.

UPCOMING EVENTS
