Fall (And Soon Winter) Is Here!

November 2024

We have officially reached Peak Fall here in Upstate New York. To many who live here, this is the very best season of the year. The leaves have changed their colors to golden yellow, orange and red, and the scenery is just beautiful. The temperatures have dropped, but are still quite pleasant: the quintessential Sweater Weather. In a matter of weeks, the true winter cold will move in, so we're content to enjoy these fall days while they last.

We're wrapping up another great year here at HVI. We traveled to quite a few trade shows & conferences in the late summer and early fall and are already beginning to plan for our 2025 conference schedule.

Business has been good, and we're already at capacity for the rest of this year. We have a lot to be thankful for as we enter the holiday season, and we couldn't have done it without YOU - our loyal customers. Thank you to all for your business and support over the last 25+ years.

What are you most thankful for this year? Business achievements? Family or personal wins? A little bit of well-earned vacation time?

Drop us a line in on our inbox or a comment on one of our social media channels!

Follow Us on Social Media

Psssst! Be sure to follow us! We share content several times a month on our different channels, like photos from some of our recent trips across the globe, updates from

happy HVI customers, and of course some of our more memorable milestones over the last 25+ years. If you don't already follow us, you can find us here on LinkedIn:

<https://www.linkedin.com/company/high-voltage-inc./>

You can find us here on Facebook:

<https://www.facebook.com/thevlfsource/>

We are always looking to expand our video-based content and we have a YouTube channel you can subscribe to, which can be found here:

DBT Series - Benchtop DC Hipot Tester

PRODUCT SPOTLIGHT

This Quarter's feature product line is the DBT Series of DC hipot testers.

Similar to our flagship line of DC hipots in the PTS Series, the DBT Series comes designed in benchtop cabinets, suited for the industrial and commercial markets. These hipots are excellent for DC withstand testing of medium and high voltage electrical components and apparatus.

Single piece designs come sized from 37.5 kV DC to 80 kV DC. For higher output voltages, the 2 piece units come sized from 100 kV DC to 600 kV DC.

If you are in the market for a versatile DC hipot in an industrial or manufacturing setting, you should definitely consider a DBT Series unit. Check out the main DBT Series page on your website through the link below, or Download our brochure:

<https://hvinc.com/products/dc-hipots-megohmmeters/dbt-series/>

If you need assistance in sizing or choosing an DC hipot, contact us at sales@hvinc.com

Early PFT Series Unit: Still In Service!

We recently learned that one of the earliest hipots that HVI built and shipped is still out in field and working hard. This particular unit is a PFT-503CM and has serial number 006! It was sold all the way back in April 1999 and while it's taken a little bit of a licking, it's kept on ticking.

When we say that our units are durable and built to last, we mean they're built to LAST. We at HVI and our trusted partners provide recalibration and repair services, and with a little bit of basic maintenance, our units will continue to work like a charm for decades. They are the best value in the industry, bar none.

Tan Delta Bridge Video Now Live On YouTube and Website!

Just a reminder that HVI has a YouTube channel! We have Sales videos for several of our most popular product lines, so if you're trying to decide on a hipot or other high-voltage testing equipment, you can learn more about our wide range of offerings.

Our most recent addition to the Channel was a Product Overview and Training Video for our Tan Delta Transducers, also known as Tan Delta Bridges. This product line is an add-on accessory for our flagship VLF E-Series of Very Low Frequency (VLF) AC Hipots.

Tan Delta testing is a well understood methodology for cable diagnostics and cable systems maintenance, with testing criteria set forth within the IEEE 400.2 standard. The video shows how to use HVI's TD-65E devices, as well as how to apply the IEEE standards to Tan Delta test results.

You can check out the Tan Delta Video here:

HVI Guests: A-T Energy from Hanoi, Vietnam

HVI had the pleasure of receiving some special guests recently. Nguyen Minh Thang and Truong Xuan Truong from A-T Energy visited us at our office in Copake, NY. Their visit was part of a 5000-kilometer tour of the eastern seaboard, from Florida all the way up to Maine, with stops at Washington, D.C., New York City, Niagara Falls, and of course Copake, NY!

A-T Energy is one of our trusted partners in East Asia, with a main office in Hanoi, Vietnam, and local branches in Ho Chi Minh City and Da Nang. They provide technology solutions for the Energy industry there, including HVI products.

We hope they had a great visit to the States and are thankful for the wonderful visit and their partnership.

High Voltage, Inc., 31 County Rt 7A, Copake, New York 12516, United States, 518-329-3275
