

Cable Testing & Fault Locating Package

SKD Series - Custom Van or Truck Mount Package

The **SKD Series** is the ideal product for those seeking a custom solution to their mobile needs for cable testing and fault locating. HVI produces all the testing and fault locating products needed for working on cable systems from 5 kVac to 138 kVac. Let HVI design and build a custom package to serve your specific needs and to fit into your specific truck or van.

The **SKD Series** integrates all the cable testing and fault locating products needed into one package designed for your vehicle needs.

Can include:

- VLF 0.1 Hz. AC Hipot
- VLF TD & PD measurement accessories
- E-Link Testing and Data Reporting Software
- Thumper/Surge Generator
- TDR/Radar for pre-location
- Acoustical & Magnetic Fault Pinpointer
- Ω -Check® Concentric Neutral Resistance Tester
- DC or AC Hipot
- 100' (30m) HV and Ground cable reels

All or some of the above installed on a common aluminum base to be bolted into your van or truck: permanently or for in-and-out when needed.
