PIONEERING THE FUTURE OF HV TESTING

Summer Days Are Over!

September 2021

It's the end of Summer here in Upstate New York. Which means outdoor cooking and activities, maybe a little golf, and the last of summer vacations and trips! HVI hopes that you're enjoyed the summer season as much as we did, especially after the last 12 to 18 months we've all had.

How was YOUR Summer ? What are you looking forward to in the Fall? Let us know!

VLF E-Series Overview and Operational Video - Now Available

Since Q1 of 2020, HVI has been adding to our extensive support content library with Product Overviews for some of our popular product lines.

This month, we're pleased to announce the release of an Overview and operational video for our VLF E-Series of AC hipots. The video walks users through the main features and benefits of the VLF E-Series before reviewing its Operation.

Used primarily for testing the integrity of high voltage cables, the VLF E-Series represents over 2 decades' worth of experience and expertise in designing and building Very Low Frequency (VLF) hipot testers. You won't find a more

feature-packed, rugged, and reliable piece of VLF technology on the market.

[Check out the VLF E-Series Product Video here](#) at , or right on the [main VLF E-Series page](#).

We'll Be At The Utility Expo! Will You?

We're excited to head out to Kentucky at the end of September for the annual Utility Expo (formerly ICUEE). We'll be displaying as a vendor in Louisville during the conference, which runs September 28th-30th.

HVI has been serving the needs of the Utility sector for over 2 decades. We have a wide range of high voltage testing

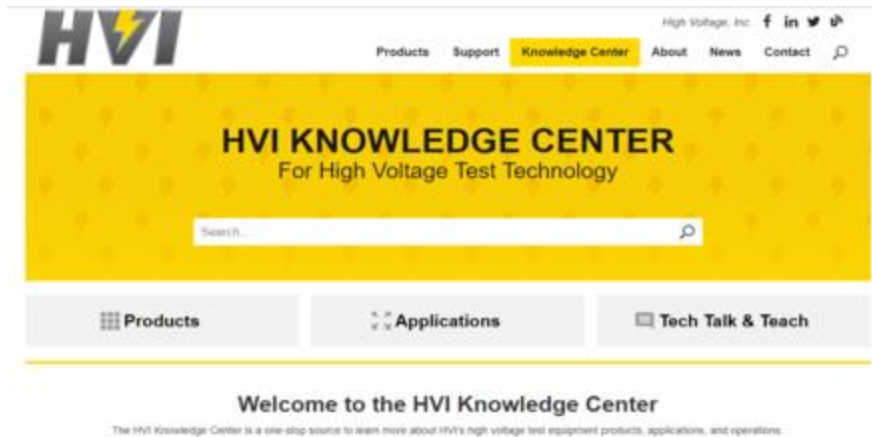

equipment for aerial lift applications, substation apparatus, cable testing, and more.

If you're attending the Utility Expo, we'd love to see you!
We'll be at Booth B1748, so please stop on by.

Knowledge Center Keeps On Growing

Originally introduced and organized around Product specific or Application specific documentation, our Knowledge Center now includes our Tech Talk & Teach library. In the spirit of continually growing and rounding out our customer support libraries, this section of Knowledge Center includes a mix of media such as videos, infographics, blog articles, case studies and more.

We've made some design changes to this area of the website, making it easier to find relevant documents and improving the overall User Experience (UX) for our customers. Be sure to check it out and bookmark it at: <https://hvinc.com/knowledge-center/tech-talk-teach/>

PRODUCT SPOTLIGHT

PFT SERIES

AC HIPOT TESTERS

HVI offers the PFT Series for a range of medium to high voltage testing applications.

Used around the world, this is one of our "flagship" product lines and one of the most popular selling lines of hipots at HVI.

DOWNLOAD PFT

SERIES BROCHURE

PFT Series AC hipots are suitable for testing a variety of electrical apparatus, including:

- Hot sticks
- Motors & generators
- Rubber gloves
- Vacuum bottles
- Switchgear
- Other resistive loads

These units' outputs range from 10kV all the way up to 100 kV, with ratings of 1kVA to 3 kVA.

If you need assistance in sizing or choosing an AC hipot, contact us at sales@hvinc.com
