PIONEERING THE FUTURE OF HV TESTING

Good to See You in 2023!

Mar 2023

It's now March, so that means the most frequent topic of conversation around here is the weather.

The weather in Upstate New York in February and March can be downright weird. One day the temperature drops down to single digits and a snowstorm rolls in, and another day it's in the mid to upper 50s (that's 12C to 15C for metric users!), and the local kids are all outside in shorts and t-shirts.

We get at least one or two "fake springs" each year around this time, almost always followed by another snow storm or two to remind us REAL spring will still be a while.

But when the weather is like this, it reminds us that we are now full swing into the new year. 2022 was a milestone year for us, as we celebrated our 25th anniversary. As we now are in 2023, we're already planning and thinking about the NEXT 25 years.

And hey, the upshot with lousy weather is that it's easier to focus on work. It's when the weather is nice, you have to worry. So at least there's that.

What are YOU looking forward to or excited about for 2023? Send us an email or drop a comment on one of our social media channels!

Follow Us on Social Media

If you're on social media....be sure to follow us! We share content several times a month on our different channels, like photos from some of our recent trips across the globe, updates from happy HVI customers, and of course some of our more memorable milestones over the last 25 years. If you don't already follow us, you can find us here on LinkedIn:

<https://www.linkedin.com/company/high-voltage-inc./>

You can find us here on Facebook:

<https://www.facebook.com/thevlsource/>

And finally, we are always looking to expand our video-based content and we have a YouTube channel you can subscribe to as well, found here:

<https://www.youtube.com/channel/UCM1VXmLOKCVWy71w6zSXKZw>

And of course, be sure to check our our ever-growing Knowledge Center, where you will find lots of helpful Product and Application information, including Documents, PowerPoints, Videos, and more! You can find it at:

PRODUCT SPOTLIGHT

ALT Series

Aerial Lift and Bucket Truck Tester

This Quarter's feature product line is the ALT Series of Aerial Lift testers.

HVI offers the ALT Series of AC hipots for testing the insulation of booms, liners, and insulating fluids in aerial lift applications. The flagship model, our ALT-130/60 is one of the most powerful and fully featured aerial lift testers on the market. It was recently upgraded from a 120kV to 130kV design and offers more bang for the buck.

Its original design was for aerial lift testing, as required by ANSI Standard 92.2; its power ratings and mobility, however, also make it suitable for a wide range of other AC withstand testing applications: iso phase buses, bushings, rubber gloves, hotsticks, and more.

If you are in the market for an aerial lift tester or general purpose AC hipot, you should definitely consider an ALT Series unit. Check out the main ALT Series page on our website through the link below:

<https://hvinc.com/products/aerial-lift-testers/>

If you need assistance in sizing or choosing an ALT Series unit, contact us at sales@hvinc.com

HVI - Around The World

HVI has been traveling more recently again compared to the last few years. And in 2023, we expect to do more of the same. Here's a little map of some of the places you might see us in 2023!

We start out the year in India, the Middle East, and sunny Orlando, Florida. Later, we'll visit Turkey, Italy and then back to the States in Louisville, Kentucky.

Hope to see you there!

HVI Travels to India for ELECRAMA 2023

Our own Ed Kirby recently traveled to Greater Noida, in the National Capital Region (NCR) of India, right outside of Delhi. He was there for ELECRAMA, the flagship tradeshow and conference for the Indian electrical industry.

He joined our friends and partners at Madhav Engineers PVT. LTD., who offer and distribute several different lines of HVI products to the local market.

Here's a photo of Ed, in his trademark bow tie, outside of the Madhav Engineers booth. You can see some HVI hipots and signage in the background. Looking good, Ed!
