PIONEERING THE FUTURE OF HV TESTING

It's Holiday Season!

December 2022

It's officially winter in Upstate New York. Snow is on the ground, and icicles coat the trees in a lovely white frost this time of year. It's a season to spend time with family and friends, and to reflect back on the last year, as we approach the beginning of another New Year.

Here at HVI, we'll remember 2022 for a few different reasons. For one, after a few years of paused or abbreviated travel schedules due to COVID, HVI got back to traveling all around the world again in 2022! From Memphis to Paris to Dubai, we racked up a lot of travel

points. But that's what we love to do: get out of the office and connect with you!

An even greater memory, however, will be our 25th Anniversary. We celebrated our 25 year history as a leader in high voltage testing all year long, from newsletters to social media content, and even a cool 25 Year Timeline page on our website! We're proud to have served you for 25 years and we look forward to the years ahead.

What were the best part of YOUR 2022? Send us an email or drop a comment on one of our social media channels!

Testimonial: Another Satisfied Customer

We recently received a nice testimonial from a customer who uses our products for rubber goods safety testing, among other applications.

"We use HV Inc. Transformers in all our new Hanco International Rubber Goods Test Equipment and recommend their Hi-Pot Units to all our Hanco Customers as well. HV Inc. is a great Company to work with. They are very helpful and informative, and they make a great product and stand behind it as well with great service and support if needed. "

*Sincerely,
Terry C. Bast*

*First Vice Chairman ASTM International Committee F18 on
Electrical Protective Equipment for Workers.*

Thanks for the kind words, Terry!

Follow Us on Social Media

And speaking of social media....be sure to follow us! We share content several times a month on our different channels, like photos from some of our recent trips across the globe, updates from happy HVI customers, and of course some of our more memorable milestones over the last 25 years. If you don't already follow us, you can find us here on LinkedIn:

<https://www.linkedin.com/company/high-voltage-inc./>

You can find us here on Facebook:

<https://www.facebook.com/thevlsource/>

And finally, we are always looking to expand our video-based content and we have a YouTube channel you can subscribe to as well, found here:

<https://www.youtube.com/channel/UCM1VXmLOKCVWy71w6zSXKZw>

And of course, be sure to check our our ever-growing Knowledge Center, where you will lots of helpful Product and Application information, including Documents, PowerPoints, Videos, and more! You can find it at:

PRODUCT SPOTLI

DTS Series

Oil Dielectric AC Test Sets

This Quarter's feature product line is the DTS Series of AC Oil Dielectric test sets.

The DTS Series provides repeatable and accurate measurements of the breakdown

voltage of insulating oils used in electrical equipment. These lightweight, rugged units are designed for field and laboratory use. They feature fully pre-programmed sequences for commonly used ASTM oil tests, including ASTM D1816/2012, ASTM D877/2013 and IEC 156/1995. They also allow for custom programming, and results can be saved directly to the device and/or exported to a computer.

Feature rich and very user-friendly, the DTS Series comes in both 60kV AC and 100kV AC sizes.

If you are in the market for an oil dielectric test set, you should definitely consider a DTS Series unit. Check out the main DTS Series page on our

website through the
link below:

HVI - On The Road and In the Skies in 2023

HVI has been traveling more recently again compared to the last few years. And in 2023, we expect to do more of the same. Here's a little map of some of the places you might see us in 2023!

We start out the year in India, the Middle East, and sunny Orlando, Florida. Hope to see you there!
